Acknowledgement

We take this opportunity to present the project documentation on

ONLINE FAN STORE

We would wish to thank all the people who have helped to make this project possible. A project for a student is an experience, in the course of which he/she realizes the real-world problems that one has to undergo during the development of any project. Hence without the help and guidance of our teachers, this project wouldn't have been successful. We are grateful to them for supporting us throughout the Design, Implementation and Evaluation phase of the project.

We are thankful to **Prof. VAISHALI CHILWAR Mam** for giving us their valuable time and also for guiding through the stages of the project and also being such a supportive project guide. We also sincerely acknowledge the help of the entire staff of the Bachelors in Computers Application Department and our classmates whose co-operation has made our project a success.

“THANK YOU!”

- **SHAIKH SAMEER FIROZ**

Introduction

It is known globally that, in today's market, it is extremely difficult to start a new small-scale business and its sustenance with competition from the well-established and settled/brand owners.

Most often, even if the quality of the product is really good, due to a lack of advertisement or business at the small scale, it just becomes another face in the sea, and the product does not reach a larger group of customers. In fast paced life of today when everyone is squeezed for time, the majority of people are finicky when it comes to doing physical shopping.

Logistically, a consumer finds a product more interesting and attractive when they find it on the website of a retailer directly and are able to see item's details online. The customers of today are not only attracted because online shopping is very convenient, but also because they have broader selections, highly competitive prices, better information about the product (including people's reviews) and extremely simplified navigation for searching regarding the product.

Moreover, business owners often offer online shopping options at low rates because the overhead expenses in opening and running a physical store are higher. Further, with online shopping, their products have access to a worldwide market, which increases the number of customers from different ethnic groups, adds customer value, and overall sustainable in the marketing.

SYNOPSIS

1. Project Title: Online Fan Store

2. Company name: Pankhe Wale

3. Technology: HTML, CSS, JAVASCRIPT

4. Team members: Shaikh Sameer Firoz & Sayyed Mohd Shahid Sharif

5. Objective/aim:

- Manage Online Selling Costs in A Strategic Way
- Establish Deeper Business Relationships
- Provide a Unique Customer Experience
- Improve Customer Loyalty
- Improve sales
- Be more memorable
- Earn market share

6. Technical Details:

The hardware software requirements are:

Minimum hardware configuration

Processor: Which can handle some productive tasks (intel/ryzen).

Ram: Minimum 64MB

Software required: Visual Studio Code, Windows/Linux.

COMPANY PROFILE

- Name of the Company: Pankhe Wale
- Email: pankhewale@gmail.com
- Address: Ness Wadia College of Commerce, Pune, Maharashtra
- Telephone: 8208916926
- Fax: 56846922
- Logo:

OBJECTIVES

- To provide security to the data.
- To decrease the time and cost involved in the existing system.
- To make the information available at any time and in less time.
- Reduce the manual work.
- Avoid the human errors
- Improve sales
- Improve Customer Loyalty
- Provide a Unique Customer Experience
- Establish Deeper Business Relationships

CLIENT REQUIREMENT INFORMATION

- Easy to use interface: The interface is easy to use.
- The homepage should display buyer, admin and seller profiles separately.
- Admin of the system can edit the database.
- Maintain the entire company's details in a secured database.
- Maintain customer details & retailer details
- Customer reports, Retailer reports, category reports, sales reports, purchases reports are all maintained.

STUDY OF EXISTING SYSTEM

- Categories: The company contains categories of coolers and different local brands registered with them.
- Orders: The company also provides delivery of orders to the customer within a limited amount of time.
- Shipping: The orders are shipped to the proper place within timescale.
- Products information: This includes all the necessary information about the products.
- Discount offers: At the festive seasons the seller also offers discounts on prices of few products.
- Product purchases: The products are purchased from various customers category wise.

PROBLEMS WITH THE EXISTING SYSTEM

- The data can be lost as it is stored in files/registers. Such data can easily be lost stolen or destroyed due to any accidents or any mutual calamity.
- The existing system is very slow, lengthy and time-consuming.
- Since a huge data is to be maintained, maintaining and retrieving information of every customer is difficult.
- As the company system is based on tele-communication, if there is an electricity shortage, network shortage it becomes a great loss to the company.
- The systems are getting corrupted by the malicious software.

PROPOSED SYSTEM

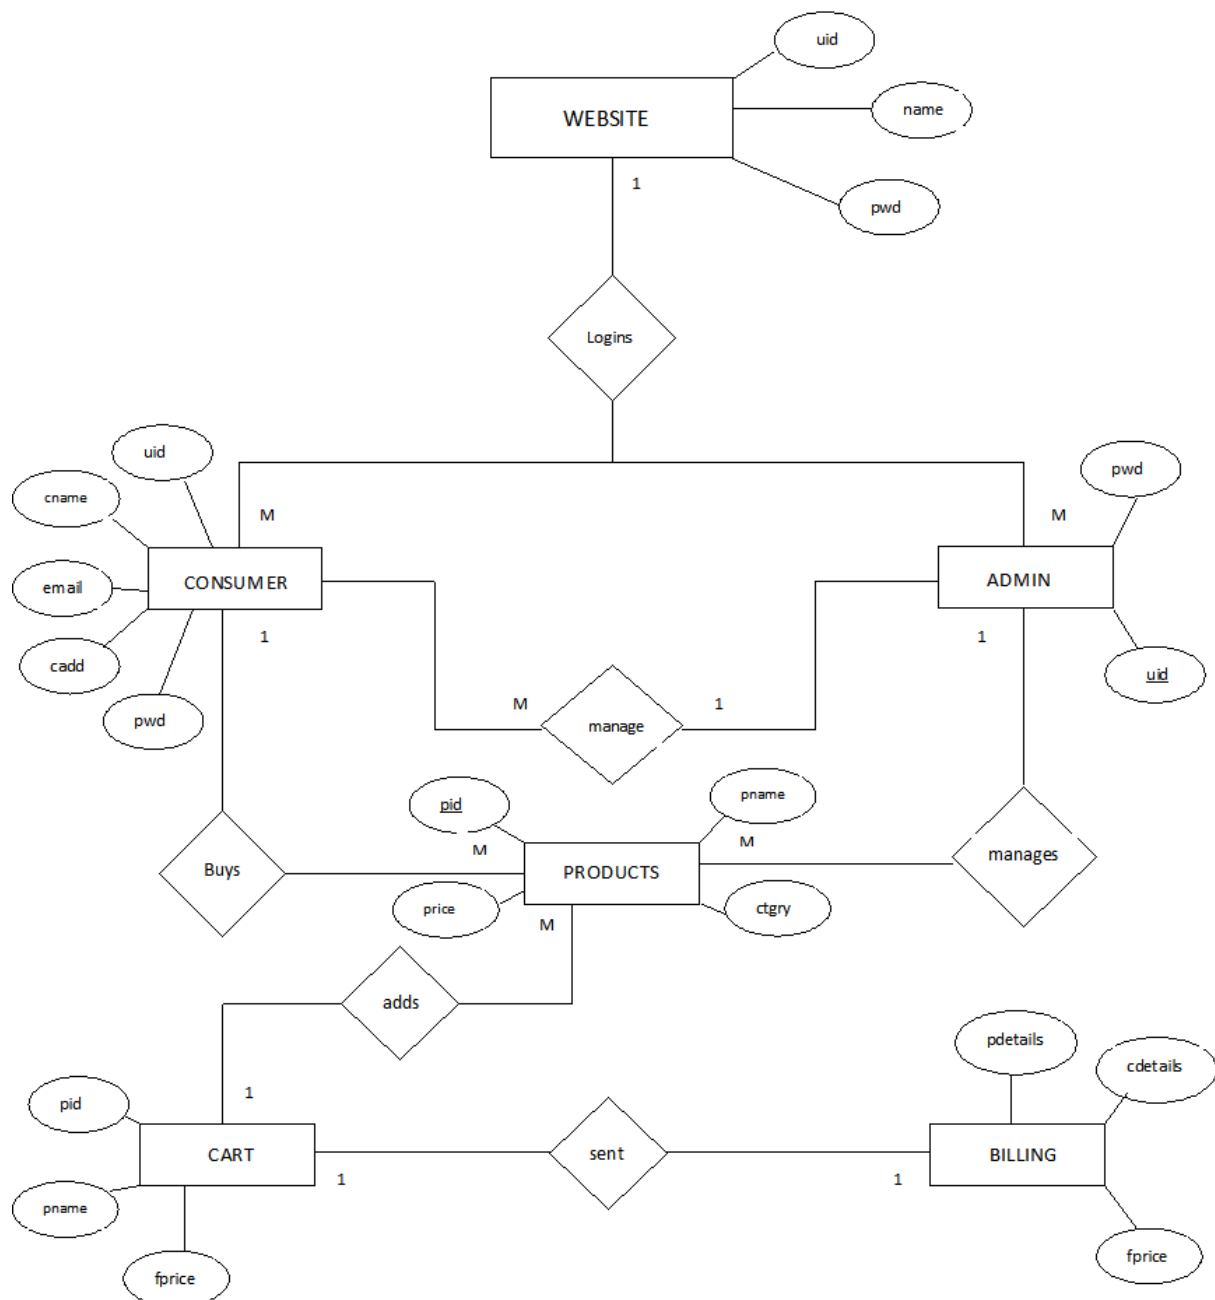

- We are developing this system which will overcome the drawbacks of the existing system.
- This system provides administrator the facility to store the information related to the retailers and customers and this information is managed safely by administrator related to the enquiries, customers, products.
- The information can be searched at any time and within fraction of seconds. So, it is time efficient.
- The user can login and choose among with registered retailers and search the and select items from the categories and add them to cart and place their order.
- The retailers can also see reports of their products and customers.

SCOPE OF PROPOSED SYSTEM

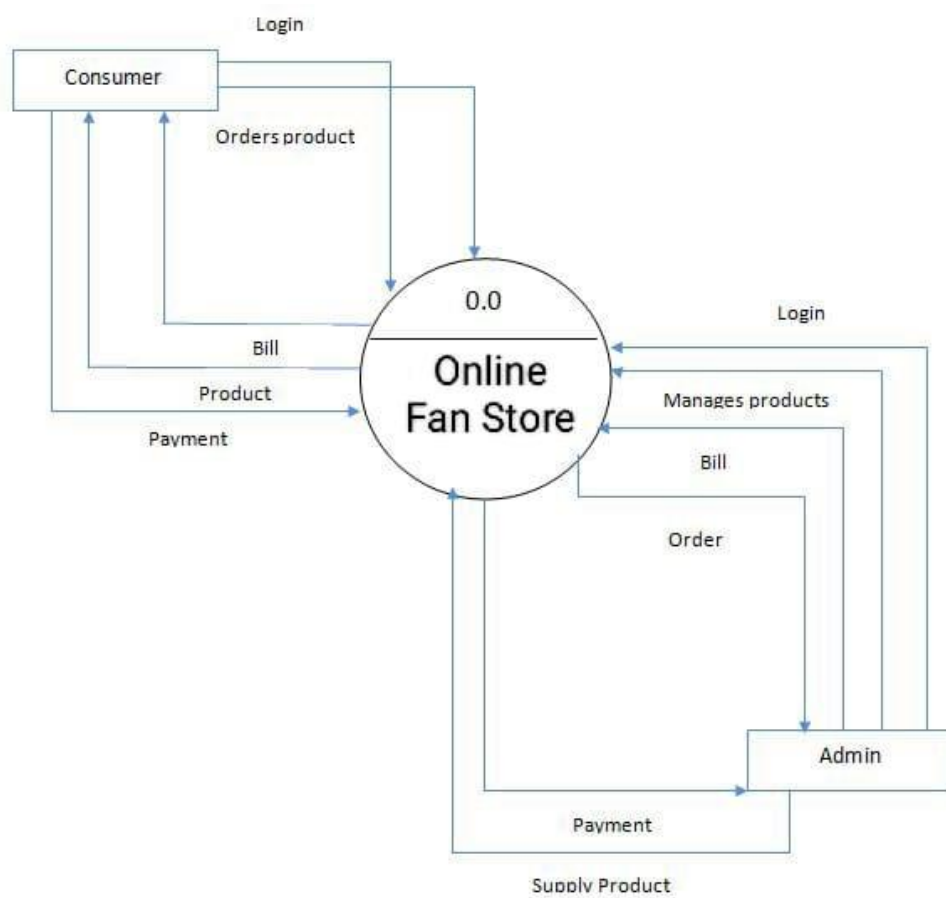

- Sales Bill: The Bill is generated depending upon the number of products sold by the seller.
- Purchase Bill: It stores information related purchases of products made by the buyers.
- Products: New products can be added, existing categories can be modified.
- Search: The information about the products, suppliers and stock can be searched by the administrator and customer anytime
- Be more memorable in the market in shot make a monopoly in the current market.
- Earn market share in the fan manufacturing industries.

Product Details

A handheld fan, or simply hand fan, is any broad, flat surface that is waved back-and-forth to create an airflow. Hand fans were used before mechanical fans were invented.It is durable and easy to use.

BENEFITS OF PROJECT

- Reduce efficiency and increase goodwill.
- Give desired and occurrence results.
- Reduce drawbacks of manual working
- Increase profitability
- Secure data from unauthorized persons
- Local Sellers will get global reach.
- Office setup cost decreases.
- Labour cost also decreases.

ADVANTAGES AND DISADVANTAGES OF PROJECT

Advantages:

- Easy access to market.
- Reduced overheads like expensive retail premises and customer-facing staff.
- Potential for rapid.
- Widen the market / export.
- Customer intelligence.

Disadvantages:

- Website cost is high.
- Need to think about the costs of physical space for order fulfilment, warehousing goods, dealing with returns and staffing for these tasks.
- Security and fraud risk is high.
- Advertising cost increases.
- It can be difficult to establish a trusted brand name, especially without a physical business.

CONCLUSION

The 'Online Fan Store' is designed to provide a web-based application that would make searching, viewing and selection of a product easier.

The search engine provides an easy and convenient way to search for products where a user can Search for a product interactively and the search engine would refine the products available based on the user's input.

The user can then view the complete specification of each product. They can also view the product reviews and also write their own reviews.

Main focus of this project is to lessen human efforts and avoid manual mistake.

We expect that this project will go a long way in satisfying user's requirement.

FUTURE ENHANCEMENTS

The following things can be done in future.

- The current system can be extended to allow the users to create accounts and save products in to wish list.
- The users could subscribe for price alerts which would enable them to receive messages when price for products fall below a particular level.
- The current system is confined only to the shopping cart process. It can be extended to have an easy to use check out process.
- Users can have multiple shipping and billing information saved. During checkout they can use the drag and drop feature to select shipping and billing information.
